

Valerie Seror, PhD

Dilemmas, Decisions, Risks and Medical Procedures

Professional Background

Valerie Seror is a senior health economist at the Inserm who obtained her PhD degree at the University of Paris I-Panthéon-Sorbonne, France and was then a post-doctoral fellow at the research center of Genetics and Public Policy Studies, Johns Hopkins Medical Institutions, Baltimore, USA.

Research

Her research interest includes risk perception and time attitudes, choices and decision-making concerning prenatal testing, targeted cancer treatments, and vaccination that is her current main research topic.

She is a member of the network “Ethics of Non-invasive Prenatal Genetic Testing” (2012, Stanford University), member of the “Challenge group 5-Shaping Sustainable Healthcare” (2016, European Commission), member of the Committee of health economics and public health of the Haute Autorité de Santé (2012), and member of the bi-monthly seminar of the Social and Decision Sciences department (2016-, Baruch Fischhoff, Carnegie Mellon University, Pittsburg, USA).
